A new dataset on export sophistication reveals that in many countries the importance of modern services, and the sophistication of manufactured and service exports, has increased over time. However, this trend was less pronounced in LICs. Sophisticated sectors are

more likely to act as a catalyst for broad-based economic growth, rather than turning into isolated enclaves, when the economy is liberalized, the exchange rate is not overvalued, and there are good information flows. An educated workforce, external liberalization, and good information flows are important prerequisites for developing sophisticated goods and services. An appropriate macroeconomic policy is particularly important for goods, skilled labor and good information flows for services.

Dunning and Lundan offer powerful insights into the societal effects of MNEs and the role of business government relations in the IB context. Journal of International Business Studies This wonderful book offers the definitive synthesis of the modern literature on the economic aspects of international business. It is encyclopedic yet full of incisive insights. It is a creative masterpiece which

unbundles the DNA of the multinational enterprise and shows how it is the cornerstone of the field of international business. Alan M. Rugman, University of Reading, UK The rise of the multinational enterprise, and the consequent globalisation of the world economy, was arguably the single most important phenomenon of the second half of the twentieth century. This magisterial book, written by two leading authorities, examines this phenomenon in depth. It explains how foreign investment by multinationals diffused advanced technologies and novel management methods, driving productivity growth in Europe, Asia and North America; however, economic inequalities were reinforced as rich countries attracted more foreign investment than poor ones. This new edition of a classic work is not only an authoritative guide to contemporary multinational business, but a major historical resource for the future. Mark Casson, University of Reading, UK This thoroughly updated and revised edition of a widely acclaimed, classic text will be required reading for academics, policymakers and advanced students of international business worldwide. Employing a distinctive and unified framework, this book draws together research across a range of academic fields to offer a synthesis of the determinants of MNE activity, and its effects on the economic and social well-being of developed and developing countries. Unique to the new edition is its focus on the institutional underpinnings of the resources and capabilities of MNEs, and the role of MNE activity in transmitting and facilitating institutional change. Since the initial

publication of this book more than a decade ago, the economic, managerial and social implications of globalisation and technological advancement have become even more varied and prominent. Accompanying these developments, there has been a rise in scholarly interest in interdisciplinary research addressing the important challenges of an ever-changing physical and human environment. Drawing on articles and books from international business and economics, as well as economic geography, political economy and strategic management, a systematic overview of the developments in scholarly thinking is prese

"This pioneering study of United States direct investment in Japan will interest academic

specialists, business managers, and government policymakers in America, Japan, and elsewhere. Drawing on rich historical materials from both sides of the Pacific, including corporate records and government documents never before made public, Mason examines the development of both Japanese policy towards foreign investment and the strategic responses of American corporations. This history is related in part through original case studies of Coca-Cola, Dow Chemical, Ford, General Motors, International Business Machines, Motorola, Otis Elevator, Texas Instruments, Western Electric, and Victor Talking Machine. The book seeks to explain why so little foreign direct investment has entered modern Japan. In contrast to the widely held view that emphasizes an alleged lack of effort on the part of foreign corporations, this study finds that Japanese restrictions merit greater attention. Many analysts of the modern Japanese political economy identify the Japanese government as the key actor in initiating such restrictions. Mason finds that the influence of Japanese business has often proved more potent than these analysts suggest. This book offers fresh insights into both the operation of the modern Japanese political economy and of its relations with the world economy."
