Management decisions on appropriate practices and policies regarding tropical forests often need to be made in spite of innumerable uncertainties and complexities.

Among the uncertainties are the lack of formalization of lessons learned regarding the impacts of previous programs and projects. Beyond the challenges of generating the proper information on these impacts, there are other difficulties that relate with how to socialize the information and knowledge gained so that change is

transformational and enduring. The main complexities lie in understanding the interactions of social-ecological systems at different scales and how they varied through time in response to policy and other processes. This volume is part of a broad research effort to develop an independent evaluation of certification impacts with stakeholder input, which focuses on FSC certification of natural tropical forests. More specifically, the evaluation program aims at building the evidence base of the empirical biophysical, social, economic, and policy effects that FSC certification of natural forest has had in Brazil as well as in other tropical countries. The contents of this volume highlight the opportunities and constraints that those responsible for managing natural forests for timber production have experienced in their efforts to improve their practices in Brazil. As such, the goal of the studies

in this volume is to serve as the foundation to design an impact evaluation framework of the impacts of FSC certification of natural forests in a participatory manner with interested parties, from institutions and organizations, to communities and individuals.

Carmakers release new models every year with advanced technology to attract consumer interest and to satisfy increasingly stringent government regulations. Some of these technologies are firsts or leading-edge, and they start trends that more companies will soon follow. Snapshots of the direction of the automotive industry, along with OEM and supplier perspectives, are presented in these articles that have been collected by the Editors of Automotive Engineering whose aim

is to provide the reader with a complete overview of the key advances that took place over the course of one model year. • Provides a single source for information on the key engineering trends of one year. • Allows the reader to skip to chapters that cover specific car models that interest them, or read about all models from beginning to end. • Includes plenty of big, full-color images and the facts about the most recent technology and engineering innovations. Each car manufacturer has its own chapter exploring new models in-depth. The yearly trends and innovations that make

the automotive industry fascinating to both the engineer and the customer are all captured in the imagery and easy-reading of this full-color book.

"Crossing Borders is
the best textbook
available for
International Studies

courses. It tackles complex global issues from a multidisciplinary perspective, doing so in a way that is both accessible and engaging for students. Most importantly, students come away with an understanding of how those issues impact their day-to-day lives, as well as how they can participate in the increasingly interconnected world around them as global citizens." —Michael Makara, University of Central Missouri

Crossing Borders provides a framework for students built upon an understanding of the many borders that define the international system. Renowned authors Harry I.

Chernotsky and Heidi H. Hobbs address many of the different fields that constitute international studies—geography, politics, economics, sociology, and anthropology—and give instructors a starting point from which they can pursue their own disciplinary interests. By integrating research and current examples, the Third Edition encourages students to identify their role in today ' s international arena and what it means to be a global citizen. Not only do students develop a better understanding of the world, they also receive advice on how to increase their own global engagement

through study abroad, internships, and career options. This Third Edition is thoroughly updated to reflect recent events and trends, including cyberterrorism, the rise of ISIS, and other key issues. It offers new color maps and clear learning objectives for every chapter, giving students a solid understanding of the complexity of the issues facing the world today. Give your students the SAGE edge! SAGE edge offers a robust online environment featuring an impressive array of free tools and resources for review, study, and further exploration, keeping both instructors and

students on the cutting edge of teaching and learning. Learn more at edge.sagepub.com/chernotsky3e.

If you want to learn how to buy, drive, and maintain a recreational vehicle to travel and live the RV lifestyle, then check out HowExpert Guide to RV Life.

HowExpert Guide to RV Life is a book for folks who don't know much about RVs but feel they need to learn more about them. It covers topics such as: – What is an RV and how it can be used. – Different types and classes of RVs from the smallest trailer RVs up to the largest motorhomes. –

Necessary terms and their definitions which

RVers need to know. – What makes an RV different or similar to a regular house. – What homework and knowledge are needed to get the best RV for anyone. – Points for each type of RV. – How to find the best dinghy for folks with motorhomes. – What might be a way to try before you buy an RV. – What can be learned by going to an RV show. – What type of motorhome will be the quietest and best riding one. – What are the roomiest RVs. – What are the least expensive RVs. – Different ideas on where to travel once the RV is purchased. – The difference between a “shake-down cruise” and a “maiden voyage.” – Construction of RVs. – What RV appliances are like, and which ones to

watch out for. – What “full hookup” means at campsites. First-hand experiences and suggestions are given throughout the book, which can help the person looking for more information on RVs or the RV newbie with the beginning of their RV experience. Check out HowExpert Guide to RV Life to learn how to buy, drive, and maintain a recreational vehicle to travel and live the RV lifestyle! About the Author Charley Dickson is a former Oregonian who now lives full-time in a 38’ Class A motorhome in various places around the country. In his 30+ years of RVing, he and his wife have traveled in a pop-up trailer, a 30’ travel trailer, a 29’ Class C motorhome, a 40’ 5th wheel trailer, and two

Class A motorhomes. He’s been to most of the country, but there are still many places he and his wife will be seeing. He’s a firm believer in being more of a do-it-yourselfer rather than having someone else do a repair or modification. As such, he’s a staunch supporter of doing the homework to find out as many aspects of a certain subject as possible. As such, this book is written for other folks who want to know more about RVing. HowExpert publishes how to guides by everyday experts. 2016 Passenger Car and 2015 Concept Car Yearbook Haynes Manuals N. America, Incorporated Darwin Stephenson's message in Inspiration Divine reveals a simple understanding of how discovering one's purpose will bring about the

enlightenment of both yourself and all of humanity. By distinguishing what we are and why we're here, Inspiration Divine provides a prescription for evolving beyond our current physical existence to a Spiritual existence. Whereas science and religion struggle to find common ground, Inspiration Divine reveals an understanding of our Universe, God and Humanity to bring evolution, physics and the Divine into a single theory. Filled with timely and powerful tools for transformation, Inspiration Divine brings a Spiritual practice into the reality of our everyday lives by helping us awaken to the messages from the Divine that are all around us.

Flying Magazine
AuthorHouse
F1 Mavericks is the story of the grandest, most influential, and

most fondly remembered era in Formula 1 racing as seen through the lens of master motorsports photographer, Pete Biro. The period from 1960 to 1982 saw the greatest technological changes in the history of Formula 1 racing: the transition from front engines to rear engines, narrow-treaded tires, massive racing slicks, zero downforce, and neck-wrenching ground effects—and, of course, a staggering increase in performance and reduction in lap times. In short, the period saw the creation of the modern Formula 1 car. This is also the time when legendary names who defined F1 were out in full force: Jim Clark, Jack Brabham, Dan Gurney, Sir Jackie Stewart, Graham Hill, Niki Lauda,

James Hunt, Bruce McLaren, Jody Scheckter. We ' ll see and meet all of them. But F1 Mavericks also focuses on the designers and engineers behind the cars—men like Colin Chapman, Sir Patrick Head, Maurice Philippe, Franco Rochhi, Gordon Murray, and many others. We ' ll hear directly from many of them, including a foreword from 1978 F1 World Champion, Mario Andretti. Every chapter is a photographic account of key races throughout the period, supplemented with sidebars featuring key designers and technologies, like wings, ground effects, slick tires, turbochargers, and the Brabham “ fan ” suction car. F1 Mavericks is an international story, and includes loads of

information on designs from Japan (Honda), Britain (McLaren, Tyrrell, Cooper, BRM) Italy (Ferrari, Maserati, Alfa Romeo), France (Matra, Ligier, Renault), Germany (Porsche, BMW) and the United States (Eagle, Shadow, Penske, Parnelli). Strap yourself in for the story of the greatest era in Formula 1 racing—it's all here in F1 Mavericks.
