This book is just what the title says. It is the distillation of what the Lin and Larry learned during more than 47 years of sailing together, years during which they covered more than 210,000 miles on board their two cutters, Seraffyn and Taleisin, and on scores of other boats they have delivered or raced. Lin and Larry tell how they have sailed in comfort and safety without large cash outlay- on a pay-as-you-earn-as-you-go plan and by simplifying. The first two editions of this invaluable text have seen more than 60,000 copies reach people who dream of setting sail, be it for a weekend voyage across to an offshore island, or for a world circumnavigation. Lin continues voyaging now she is well into her seventh decade of life. Armed with what she is learning as she explores the islands and far corners of the Tasman Sea, she has updated and revised the information found in the original edition plus added several new chapters. Amidst the new material is an extensive look at the lessons learned as Lin and Larry safely negotiated the stormy waters around Cape Horn and beyond. This book could help you cut the ties that bind you to shore.

In Olen Steinhauer's bestseller The Tourist, reluctant CIA agent Milo Weaver uncovered a conspiracy linking the Chinese government to the highest reaches of the American intelligence community, including his own Department of Tourism---the most clandestine department in the Company. The shocking blowback arrived in the Hammett Award--winning The Nearest Exit when the Department of Tourism was almost completely wiped out as the result of an even more insidious plot. Following on the heels of these two spectacular novels comes An American Spy, Olen Steinhauer's most stunning thriller yet. With only a handful of "tourists"—CIA-trained assassins—left, Weaver would like to move on and use this as an opportunity to regain a normal life, a life focused on his family. His former boss in the CIA, Alan Drummond, can't let it go. When Alan uses one of Milo's compromised aliases to travel to London and then disappears, calling all kinds of attention to his actions, Milo can't help but go in search of him. Worse still, it's beginning to look as if Tourism's enemies are gearing up for a final, fatal blow. With An American Spy, Olen Steinhauer, by far the best espionage writer in a generation, delivers a searing international thriller that will settle once and for all who is pulling the strings and who is being played. An American Spy is one of The New York Times Notable Books of 2012.

Boaters new to the waters around Cape Coral, Ft. Myers, Pine Island, and the barrier islands in Pine Island Sound are surprised to learn how different these waters are to any they have experienced in other parts of the country. Four unique waterways converge, each bringing their own challenges as they lead out to the Gulf of Mexico. The last 35 miles of the Caloosahatchee River flow down from the north, where the river meets San Carlos Bay, Pine Island Sound, and Matlacha Pass. These waters in many parts are shallow, forcing boaters to carefully navigate narrow and sometimes shallow channels to get to where they want to go. This guide attempts to help boaters understand where the various main and side channels can take them. Along the way it points out which channels to take a pass on, and which might lead to an interesting adventure.

Adirondack history is a tale written o~ the water. In the Adirondacks, people have traveled,

conducted warfare, hunted and fished, gone to church, proposed marriage, and driven logs in, on, from, or by water. Without boats, small and large, Adirondack history—social, recreational, commercial, and environmental—would be an affair entirely different from what we have come to know. In this lavishly illustrated account, Hallie E. Bond presents a history of these boats—canoes, sailboats, power launches, outboards, and the indigenous guideboat—that figure prominently in the overall history of the Adirondacks. The pre-contact Indians paddled dugout and bark canoes; in the seventeenth and eighteenth centuries these craft were joined by skiffs and bateaux. Between 1820 and World War II, a distinctive tradition of boat building developed, culminating in the famous Adirondack guideboat. As the nineteenth century progressed, a variety of small, fresh water, muscled-powered boats was produced in the Adirondacks—an assemblage matched by only a few places in the country. There were the canoes and the men that made them famous—John Henry Rushton and Nessmuk—and the guideboats and their builders—H. Dwight Grant and Willard Hanmer. In the early twentieth century, the development of the internal combustion engine irrevocably changed not only boat use and design, but life and leisure in the Adirondacks. Bond skillfully captures the whole panorama of boats and boating in the Adirondacks, from early dugouts and bateaux to the highpowered inboards that won Gold Cup races on Lake George and the Kevlar pack canoes of today. Drawing on her experience as an historian and Curator of Collections and Boats at the Adirondack Museum, Bond places events and trends of the region in the context of national and international history and describes the significant contribution of the Adirondacks in the early twentieth-century development of recreation and travel in America. *Boats and Boating in the Adirondacks* also includes a descriptive catalog of boats from the museum's own collection with nearly two hundred illustrations in addition to those in the narrative, a list of boatbuilders active in the North Country before 1975, and a valuable glossary of terms.
