James W. Martin is a Florida Bar Board Certified Real Estate Lawyer and Adjunct Professor of Law at Stetson University College of Law who, for over forty years, has practiced Florida real estate, wills, trusts, probate, corporations, nonprofits, and business law. The author has seen too many nonprofit corporations improperly formed and maintained. Some failed to file for tax-exempt status after incorporation; some failed to hold annual meetings and file annual reports; some failed to prepare meeting minutes and maintain records; and some failed to follow statutory procedures. Failure to comply with the basics of nonprofit corporation law can result in real estate title problems, litigation, taxes, penalties, and potential personal liability. This book provides a step-by-step process with forms and checklists for forming and maintaining Florida nonprofit corporations to avoid these problems. It is primarily directed to lawyers because Florida nonprofit corporations are legal entities created under the Florida Not For Profit Corporation Act, so having a law degree really should be a prerequisite to forming and maintaining nonprofit corporations.

However, the author realizes that we live in an age where nonlawyers freely access these materials on the Internet, so he has written this book in plain language that does not require a law degree to understand. But his message for nonlawyers reading this book is to be sure to engage a Florida-licensed lawyer on their behalf to review any document before it is signed or filed.

Validity of Corporate Acts Not Authorized by Formal Vote Or Resolution in Directors Meeting James W. Martin, P.A.

Private corporations are rarely discussed as

playing a role in efforts to curb civil violence, even though they often have strong interests in maintaining stability. Violence often damages the infrastructure necessary to deliver goods to market or may directly target companies. Corporations also have a normative obligation to conduct business in ways that promote peace. While there are historical examples of firm-instigated violence and firms reaping benefits from instability and conflict, there is also evidence that corporations proactively engage in peacebuilding. For example, firms devise programs to promote economic development, offer access to education, and employ former combatants. In *The Building and Breaking of Peace*, Molly M. Melin develops a theory of the conflicting roles corporations play in both building and preventing peace. Melin shows that corporations engage in peacebuilding when there is a gap in the state's capacity to enforce laws, but they also weigh the opportunity costs of peacebuilding, responding to the need for action when conditions enable them to do so. Firms are uniquely situated in their ability to raise the cost of violence, and proactive firms can increase the years of peace in a country. At the same time, an active private sector can make it harder for states with ongoing conflict to reach an agreement, as they act as an additional veto player in the bargaining process. Including original cross-national data of peacebuilding efforts by firms in Latin America, the Middle East, and Africa from 2000 to 2018, and in-depth case analyses of corporate actions and outcomes in Colombia, Northern Ireland, and Tunisia, Melin shows that corporations help to prevent violence but not resolve it. In examining the corporate motives for peacebuilding and the implications of these activities for preventing violence and conflict resolution, the book builds a more holistic picture of the peace and conflict process. The findings also help explain why armed civil conflicts persist despite the multitude of diverse actors working to end them.

This volume examines some of the major factors—social, demographic, and environmental—that account for the success of communal irrigation in Ilocos Norte and, by implication, its absence in adjacent areas, other parts of the Philippines, and, more widely, in other parts of insular Southeast Asia. However, whether this explanation accounts for all the factors involved, or even adequately weighs those that are here discussed, is secondary to the main concern of this volume: corporate groups. What *zanjeras* [irrigation societies] show are repeated examples of how individual farmers, working in concert, developed and employed corporate principles to the solution of a common goal or problem. It is a kind of "solution" that has been widely and effectively employed in much of human history.
