The bestselling  
author of No Logo  
shows how the global  
"free market" has  
exploited crises and  
shock for three  
decades, from Chile  
to Iraq In her  
groundbreaking  
reporting, Naomi  
Klein introduced the  
term "disaster  
capitalism." Whether  
covering Baghdad  
after the U.S.  
occupation, Sri  
Lanka in the wake of  
the tsunami, or New  
Orleans post-

Katrina, she  
witnessed something  
remarkably similar.  
People still reeling  
from catastrophe were  
being hit again, this  
time with economic  
"shock treatment,"  
losing their land and  
homes to rapid-fire  
corporate makeovers.  
The Shock Doctrine  
retells the story of  
the most dominant  
ideology of our time,  
Milton Friedman's  
free market economic  
revolution. In  
contrast to the  
popular myth of this  
movement's peaceful  
global victory, Klein  
shows how it has  
exploited moments of  
shock and extreme  
violence in order to  
implement its  
economic policies in  
so many parts of the  
world from Latin

---

America and Eastern Europe to South Africa, Russia, and Iraq. At the core of disaster capitalism is the use of cataclysmic events to advance radical privatization combined with the privatization of the disaster response itself. Klein argues that by capitalizing on crises, created by nature or war, the disaster capitalism complex now exists as a booming new economy, and is the violent culmination of a radical economic project that has been incubating for fifty years.

The transformation of schooling from a twelve-year jail sentence to freedom to learn. John Taylor

Gatto's Weapons of Mass Instruction, now available in paperback, focuses on mechanisms of traditional education which cripple imagination, discourage critical thinking, and create a false view of learning as a byproduct of rote-memorization drills. Gatto's earlier book, Dumbing Us Down, introduced the now-famous expression of the title into the common vernacular. Weapons of Mass Instruction adds another chilling metaphor to the brief against conventional schooling. Gatto demonstrates that the harm school inflicts is rational and deliberate. The real function of pedagogy, he argues, is to render the common population manageable. To that end, young people must be conditioned to rely upon experts, to remain divided from natural alliances and to accept disconnections from their own lived experiences. They must at all costs be discouraged from developing self-reliance and independence. Escaping this trap requires a strategy Gatto calls "open source learning" which imposes no artificial divisions between learning and life. Through

this alternative approach our children can avoid being indoctrinated-only then can they achieve self-knowledge, good judgment, and courage.

This aim of this open access book is to launch an international, cross-disciplinary conversation on fatherhood engagement. By integrating perspective from three sectors -- Health, Social Policy, and Work in Organizations -- the book offers a novel perspective on the benefits of engaged fatherhood for men, for families, and for gender equality. The chapters are crafted to engaged broad audiences, including policy makers and organizational leaders, healthcare

practitioners and fellow scholars, as well as families and their loved ones.

How to Gain a Positively Unfair Advantage on the River - Even if You're Unsure what the MANY Variations of "Euro

Nymphing" Actually Involve... INCLUDING Over 2 hours of supporting video material (designed to be worth the price of the book on its own) Hands up who knows what Euro nymphing is? It's incredibly popular and causes many online arguments - yet most anglers show CLEAR GAPS in their skills and knowledge. So if you want to go beyond bobbers and split shot, you'll need to dodge an overwhelming tide of BS online covering "Tight Line Nymphing" and European competition methods. While there are good books available, certain tactics are left out (keeping a number of methods known only to a handful of top anglers) and it is difficult to build a strategy for choosing and using each of the different rigs, methods and flies. The aim of this book is to arm

---

you with the most complete range of tactics possible and give you the confidence to tackle new waters and different conditions. It does this by clearly explaining WHY to choose - as well as HOW to use - each rig & technique. The methods include: Czech nymphing (both the little-known LONG-line variant & the famous SHORT-line tactics) Polish nymphing Ladder Leader Nymphing (so you can quickly alter the spacing between your droppers, which means you're more likely to actually benefit from those "fine-tuning" tweaks) Classic French Nymphing The family of modern "Nympe au Fil", Pêche a la Sempé and Spanish Nymphing French Leader with Dry Fly French Leader with Streamer Duo and Trio (Euro-style Hopper/Dropper with "everything off the water" up to the dry) Slovakian nymphing ...and even a little "suspension" nymphing so that the typical "Tight-line Euro tactics" don't have it all their own way All this is underpinned by the understanding of a freshwater biologist (and nymph fishing addict) which reveals important secrets of predators and prey behaviour in our rivers - and how to hotwire that system with our artificial flies. Stories from around the world bring the tactics to life - as well as making the take-home messages much more memorable (so you'll actually use them in your own fishing) PLUS: Full color photos of actual flies gifted during major international competition events which let you peek inside boxes of multiple World Championship competitors (including captains and coaches) Multiple Detailed Spotlight

An approach to performance-based assessments that embeds assessments in digital games in order to measure how students are progressing toward targeted goals. To succeed in today's interconnected and complex world, workers need to be able to think systemically, creatively, and critically. Equipping K-16 students with these twenty-first-century competencies requires new thinking not only about what should be taught in school but also about how to develop valid assessments to measure and support these competencies. In *Stealth Assessment*, Valerie Shute and Matthew Ventura investigate an approach that

---

embeds performance-based assessments in digital games. They argue that using well-designed games as vehicles to assess and support learning will help combat students' growing disengagement from school, provide dynamic and ongoing measures of learning processes and outcomes, and offer students opportunities to apply such complex competencies as creativity, problem solving, persistence, and collaboration. Embedding assessments within games provides a way to monitor players' progress toward targeted competencies and to use that information to support learning. Shute and Ventura discuss problems with such traditional assessment methods as multiple-choice questions, review evidence relating to digital games and learning, and illustrate the stealth-assessment approach with a set of assessments they are developing and embedding in the digital game Newton's Playground. These stealth assessments are

intended to measure levels of creativity, persistence, and conceptual understanding of Newtonian physics during game play. Finally, they consider future research directions related to stealth assessment in education.
