Racism and police brutality are not thinly veiled political concepts. They are the reality that Americans of African descent must live with as unwelcome companions of our daily existence. As common as the air we breathe or the water we drink or the food we eat, we must stay woke to this existential energy to recognize and describe our truth to navigate our environment with clarity to survive. Encountering these realities often results in the need to activate our best friend, JUSTICE. Born during the Jim Crow plagued South, and later a participant in the 1960s Civil Rights Movement, Vashti Sherrod is no stranger to racism. But even she couldn't imagine the horror she would experience one day as her husband and she left their home for a simple errand. In Reclamation] [Breaking] [the] [Chains] [of] ][Racism] [and] [Police] [Brutality, Vashti transports the reader back to the nightmare that involved her own "Karen" long before the alter-ego became a popular reference in 2020.

Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel

and representatives of interested Federal and State Agencies. Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardized up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation. snowblowers, machines powered by small gas engines have become a permanent—and loud—fixture in American culture. But fifty years of high-speed fun and pristine lawns have not come without cost. In the first comprehensive history of the small-bore engine and the technology it powers, Paul R. Josephson explores the political, environmental, and public health issues surrounding one of America's most dangerous pastimes. Each chapter tells the story of an ecosystem within the United States and the devices that wreak havoc on it—personal watercraft (PWCs) on inland lakes and rivers; all-terrain vehicles (ATVs) in deserts and forests; lawn mowers and leaf blowers in suburbia. In addition to environmental impacts, Josephson discusses the development and promotion of these technologies, the legal and regulatory efforts made to improve their safety and environmental soundness, and the role of owners' clubs in encouraging responsible operation. Synthesizing information from medical journals, recent environmental research, nongovernmental organizations, and manufacturers, Josephson's compelling history leads to one irrefutable conclusion: these machines cannot be operated without loss of life and loss of habitat.

The old masters of dealt only with the static features of the positional rules of chess. But these are insufficient to explain the basics of chess. The problem is that chess, like in other sciences, has undergone a dynamic revolution, but chess literature doesn't yet reflect it. In this major work Aagaard accessibly explains the rules of attack (the exploitation of a dynamic advantage), balanced between understandable examples, and deep analysis. Five years in the making, this book deals with weak kings, sacrifices, various minor attacking themes, intuitive sacrifices, opposite castling, modern king hunts, and enduring initiative.

This book addresses key questions about the materials used for the wind instruments of classical symphony orchestra such as flutes, clarinets, saxophones, oboes, bassoons and pipe organs. The content of this book is structured into four parts. Part 1- Description of materials for wind instruments deals

---

with wood species and materials for reeds used for making clarinet, oboe and bassoon- and, with metallic materials and alloys for - horn, trumpet, trombone, etc. Auxiliary materials associated with the manufacturing of wind instruments are felt, cork, leather and parchment. Part 2- Basic acoustics of wind instruments, in which are presented succinctly, some pertinent aspects related to the physics of the resonant air column. An important aspect discussed is related to the effect of wall material on the vibration modes of the walls of wind instruments. The methods for measuring the acoustical properties of wind instruments are presented. Part 3- Manufacturing of wind instruments, describes the technology used in manufacturing metallic tubes and pipes made of wood. Part 4 - The durability and degradation of materials addresses data about methods for cleaning wind instruments, studies factors producing degradation of organ pipes, describes methods of conservation and restoration of brass instruments and of historical pipe organs. Finally, the properties of marble are described, being the only one nondegradable and sustainable material used for pipes for organs.

The compendium on Rheumatic Diseases found its origin in the successful EULAR on-line course on rheumatic diseases. The yearly updated reviews of the fifty modules of that course form the content of this book. Each chapter is written by two dedicated expert rheumatologists from two different countries, to get a balanced view. Most of them were assisted by a junior doctor or researcher from their own department, in order to stimulate focus on modern educational goals and techniques. The fifty chapters, encompassing the whole spectrum of rheumatology, brought together in a textbook, are a vital part of rheumatologists' continuing medical education, keeping doctors up to date in daily practice. The structure of the chapters in the Compendium is the same as the one of the modules in the on-line course: starting with learning points, text with many figures, tables and pictures, a summary, and a limited number of key references.
