Cape Town's Magnet Theatre has been a positive force in south African theatre for three decades, a crucial space for theatre, education, performance, and community throughout a turbulent period in south African history. offering a dialogue between internal and external perspectives, as well as perspectives from performers, artists, and scholars, this book analyses Magnet's many productions and presents a rich compendium of the work of one of the most vital physical theatre companies in Africa. Co-publication with UNISA Press.

Magnificent Joe John Wiley & Sons
This volume makes an important contribution to the growing literature on management consulting. It brings together international contributors from a

wide variety of backgrounds and draws on recent empirical research from a diverse range of countries, consultancy firms, and client companies. The analysis focuses on three key areas. The first part of the book looks at the emergence and development of the consulting industry in different countries and time periods. The interplay between national systemic context and outside influences is stressed, and the efforts of consultants to become recognized as 'legitimate' knowledge carriers by their clients is highlighted, in competition — and sometimes cooperation — with other suppliers of management knowledge, notably academia. The

volume goes on to consider the generation, management, and validation of consulting knowledge by consultancy organizations and management gurus, showing how these activities are influenced not only by the consultancies' own characteristics in terms of size, structure, and national origin, but also by the (national and cultural) context in which they are operating, and by the role of 'gatekeepers', such as book publishers or journalists. The third part of the book focuses on the nature and dynamics of the consultancy-client relationship, focusing especially on the ways in which consultants convince managers of the need to

hire outside advisors; on the reaction of those concerned in the client organization towards the consultants' recommendations; and on the methods used by the consultants to overcome the possible reluctance and resistance from within the organization. From a more theoretical point of view, the chapters in this volume also show that research on management consulting has to take into account different levels of analysis: the consulting industry as a whole and its position relative to other knowledge providers such as academia; the specific consultancy organization and its relationships with internal and external sources of knowledge; and the particular consultancy project and notably the interplay between the consultants and the various stakeholders within and outside the client organization.

Joe is different. Sensitive and vulnerable, he is bullied by the local

kids, he lives with his aging mother and the highlight of his year is playing the back-end of a horse in the local panto. Jim has no job. He also can't drive, he's never had a girlfriend and he's just been released from prison. When Jim returns home, an extraordinary friendship between the two outsiders begins. But when rumours of an unthinkable crime get out of control, Jim and Joe's loyalties are put to the test. A wonderful and utterly gripping coming-of-age story and a Barnes & Noble Discover Great New Writers Pick, *Magnificent Joe* is a funny and touching tale of the lengths we go to when everything we have is at stake.

This book constitutes the refereed proceedings of the 4th International Workshop on Machine Learning in Medical Imaging, MLMI 2013, held in conjunction with the International Conference on Medical Image Computing and Computer Assisted Intervention, MICCAI 2013, in Nagoya, Japan, in September 2013. The 32 contributions included in this volume were carefully reviewed and selected from 57 submissions. They focus on major trends and

challenges in the area of machine learning in medical imaging and aim to identify new cutting-edge techniques and their use in medical imaging.

Eleventh-century Germany Simon and Schuster

Three of the most important chronicles of eleventh-century Germany were composed in the south-

western duchy of Swabia. The chronicles reveal how between 1049 and 1100 the centripetal attraction of the reform papacy became the dominant fact of intellectual life in German reformed monastic circles. In the abbey of Reichenau Herman 'the Lame' composed a chronicle of the reign of Emperor Henry III (1039-56). His pupil, Berthold of Reichenau, continued his master's work, composing a detailed account of 1076-1079 in Germany. Bernold, a clergyman of Constance, continued the work of Herman and Berthold in a text containing the fullest extant account of 1080-1100. Herman's waning enthusiasm for the monarchy and growing interest in the newly reformed papacy were intensified in Berthold's chronicle, and writing in the new context of the reformed monasteries of southwestern Germany, Bernold preached total obedience to the Gregorian papacy. The Swabian chronicles are an indispensable resource to the student of the changing loyalties and conflicts of eleventh-century Germany.

The Blind Bargain, Or, Hear it Out Springer Science & Business Media

Magnetic Nanoparticles for Medical Diagnostics was written to encourage members of the medical profession to join experts from other fields of research in exploring the unique physical properties of magnetic nanoparticles for medical applications. It demonstrates the evolution from small groups of scientists fabricating magnetic sensors to multidisciplinary research on wide-ranging medical applications of magnetic nanoparticles, illustrating the regenerative and dynamic nature

of this area of research. The book covers the following topics: Magnetic probe and magnetic nanoparticles for sentinel lymph node biopsy, Magnetic separation of endosomes, exosomes, mitochondria and autophagosomes using magnetic beads, New affinity 200 nm diameter nanobead technology and target isolation of bioactive compounds, Fluorescent magnetic beads for medical diagnostics including rapid detection of prostate cancer biomarker PSA, Medical applications of functional viral capsid-coated artificial beads, including magnetic nanoparticles, Magnetic hyperthermia using implant type heating mediators, Synthesis, dispersion and application of stable magnetic colloids including MRI contrast agents and drug delivery, Optical and magnetic detection of fluorescent magnetic beads for medical diagnostics for point-of-care testing Book

This book demonstrates that Rome did not conquer the kingdoms of the East.

Instead, the

Ptolemaic/Seleucid royal family made Rome the seat of a new empire. This insight explains the otherwise bizarre behavior of Tiberius, Caligula, Nero and also the strange rule of Rome's puppet king Herod the Great in Jerusalem. An exciting outcome of this study is that the Roman/Herodian identities of the Gospel figures, including and especially that of Jesus, can be definitively named.

Magnetic Nanoparticles in Human

Health and Medicine Explores the application of magnetic nanoparticles in drug delivery, magnetic resonance imaging, and alternative cancer therapy. *Magnetic Nanoparticles in Human Health and Medicine* addresses recent progress in improving diagnosis by magnetic resonance imaging (MRI) and using non-invasive and non-toxic magnetic nanoparticles for targeted drug delivery and magnetic hyperthermia. Focusing on cancer diagnosis and alternative therapy, the book covers both fundamental principles and advanced theoretical and experimental research on the magnetic properties, biocompatibilization, biofunctionalization, and application of magnetic nanoparticles in nanobiotechnology and nanomedicine. Chapters written by a panel of international specialists in the field of magnetic nanoparticles and their applications in biomedicine cover magnetic hyperthermia (MHT), MRI contrast agents, biomedical imaging, modeling and simulation, nanobiotechnology, toxicity issues, and more. Readers are

provided with accurate information on the use of magnetic nanoparticles in diagnosis, drug delivery, and alternative cancer therapeutics—featuring discussion of current problems, proposed solutions, and future research directions. Topics include current applications of magnetic iron oxide nanoparticles in nanomedicine and alternative cancer therapy: drug delivery, magnetic resonance imaging, superparamagnetic hyperthermia as alternative cancer therapy, magnetic hyperthermia in clinical trials, and simulating the physics of magnetic particle heating for cancer therapy. This comprehensive volume: Covers both general research on magnetic nanoparticles in medicine and specific applications in cancer therapeutics Discusses the use of magnetic nanoparticles in alternative cancer therapy by magnetic and superparamagnetic hyperthermia Explores targeted medication delivery using magnetic nanoparticles as a future replacement of conventional techniques Reviews the use of MRI with magnetic nanoparticles to
