Textbooks are symbols of centuries-old education. They're often outdated as soon as they hit students' desks. Acting "by the textbook" implies compliance and a lack of creativity. It's time to ditch those textbooks--and those textbook assumptions about learning In Ditch That Textbook, teacher and blogger Matt Miller encourages educators to throw out meaningless, pedestrian teaching and learning practices. He empowers them to evolve and improve on old, standard, teaching methods. Ditch That Textbook is a support system, toolbox, and manifesto to help educators free their teaching and revolutionize their classrooms.

Why do the lights in a house turn on when you flip a switch? How does a remote-controlled car move? And what makes lights on TVs and microwaves blink? The technology around you may seem like magic, but most of it wouldn't run without electricity.

Electronics for Kids demystifies electricity with a collection of awesome hands-on projects. In Part 1, you'll learn how current, voltage, and circuits work by making a battery out of a lemon, turning a metal bolt into an electromagnet, and transforming a paper cup and some magnets into a spinning motor. In Part 2, you'll make even more cool stuff as you: -Solder a blinking LED circuit with resistors, capacitors, and relays -Turn a circuit into a touch sensor using your finger as a resistor -Build an alarm clock triggered by the sunrise -Create a musical instrument that makes sci-fi sounds Then, in Part 3, you'll learn about digital electronics—things like logic gates and memory circuits—as you make a secret code checker and an electronic coin flipper.

Finally, you'll use everything you've learned to make the LED Reaction Game—test your reaction time as you try to catch a blinking light! With its clear explanations and assortment of hands-on projects, *Electronics for Kids* will have you building your own circuits in no time.

The overarching objective of *A Student's Guide to Hearsay* is to help students sort out the complexities of the hearsay rule, its exceptions, and the Sixth Amendment Confrontation Clause. For each exception, this book: • Outlines the policies underlying the exception; • Lists and explains the requirements that must be satisfied for evidence to be admitted under the exception; • Explains additional issues that have arisen or are likely to arise; • Explains how the rule interacts with other rules; • Discusses tactical and procedural considerations that must be understood to appreciate how the rule plays in court; and • Provides review questions and answers that allow students to test their understanding and applications of the rules. The book also includes humorous references addressing the hearsay significance of a ham sandwich, Humpty Dumpty, the Greek god of wine, Tim McGraw, dog saliva, Derek Jeter, a squeaky boot, Leonardo DiCaprio, the French Army, the speed of sound, Commander Data, and the Chicago Cubs. The 4th edition is based on the text of the restyled Federal Rules of Evidence that will become effective December 1, 2011. It includes a detailed discussion of every Supreme Court Confrontation Clause decision from Crawford to Bryant, and also discusses the Bullcoming case which the Court will probably decide sometime this year. It includes a link to the author's web page on which updates to the Guide will be posted.
